

MERCHANT QUICK START

Explore a better fit while keeping continuity in view

A short path from a recent processing statement to a confidential review, a merchant-safe proposal, and your own decision about whether to continue.

THE PROMISE

Your existing checkout rhythm comes first: compatible equipment, payment methods, deposits, and daily workflow may remain familiar while the review is evaluated; final terms depend on the approved setup.

THE PATH AT A GLANCE

THE FIRST TWO MOVES

Start with the part you control.

These first steps make the invitation clear and create a safe place for the next conversation.

01

Share a recent statement

Use the organization invitation or merchant review page to tell us about your current processor, equipment, payment mix, and recent processing costs.

WHAT TO EXPECT

You can save your progress and upload a statement privately; sensitive bank and identity details are requested only in the official provider application later.

02

Receive a confidential review

Congregation Commerce reviews the statement and prepares an approved, merchant-safe result for you. The review is based on your business and payment mix.

WHAT TO EXPECT

A proposal view or download is information only; it does not commit you to anything.

A SIMPLE RULE

Share only what the review needs. Keep bank details, identity documents, passwords, and private statement contents out of chat and email.

THE DECISION AND THE FOLLOW-THROUGH

Review, then choose with confidence.

The review is designed to make the next step understandable. A proposal is information, and the final decision remains yours.

03

Keep your familiar workflow

Where compatible with the approved setup, your preferred equipment, payment methods, deposits, and day-to-day checkout routine may remain familiar.

WHAT TO EXPECT

Final equipment, funding, security, rates, and approval depend on provider review and the setup you accept.

04

Choose your next step

After an approved result is ready, choose Continue, Decline, or Decide later. Your choice is yours and is recorded as a clear lifecycle milestone.

WHAT TO EXPECT

You can decide only from your own verified account after an approved merchant-visible result is ready.

NEXT ACTION

Start a confidential rate review. Keep the current guide nearby; when the product changes, its screen view, PDF, AI helper, and contextual tips should change together.
